A bit about us

We are a family owned business who are passionate about what we build.

We have been building tiny homes since 2019.

We specialise in building single level custom builds specifically designed by our customers to suit their needs.

We want you to love your design and enjoy your quality built home for years to come.

We build from scratch right here in Canterbury with local products.

We believe safety is important, your tiny home comes with gas and electrical certifications.

What we use

We use high quality LVL timber framing and treated strandfloor flooring directly sourced from the Junken manufacturing plant here in New Zealand.

Our units are fully insulated both ceiling, walls and floor, wrapped in building wrap, with 20mm cavity battens and typically clad in a mixture of shadowclad and coloursteel depending on our customers requirements.

Our flashings and spouting are custom made as well as our double glazed windows which are both produced locally here in Canterbury

Our units are lined with 10mm Triboard which provides an attractive smooth and hard wearing finish.

Our ceilings are lined with 9mm grooved mdf which leaves an attractive and seamless finish.

Our trailers are Duragalv tandem axel with a removable towbar manufactured here in Christchurch. All of our trailers are registered as home built caravans with NZTA.

What we pack inside

Our custom made kitchens and wardrobes are manufactured here in Christchurch. Each kitchen is designed individually to meet your needs.

Our units are fitted with LED lighting, generous allocation of electrical sockets, instant gas hot water units, extractor fans in the kitchen and bathroom, heated towel rails, gas hobs and most units are fitted with heat pumps to assist with heating and cooling.
