A bit about us

Crafted here in Canterbury.
High Performance. Built to Last

At NZ4U2U Caravans & Tiny Homes we are a proud locally-owned Canterbury business with a passion for creating exceptional high-performance tiny homes.

Since 2019, we have specialised in designing and building premium single-level custom tiny homes that are tailored to each customer's unique lifestyle, vision, and requirements. Every home is individually crafted to deliver outstanding functionality, comfort, energy efficiency and lasting quality.

Unlike mass-produced alternatives every NZ4U2U tiny home is built from the ground up in Canterbury using quality locally sourced products, traditional building methods and skilled local tradespeople.

Our commitment to superior workmanship ensures your tiny home is built to stand the test of time, giving you confidence and peace of mind for years to come.

Safety and compliance are at the heart of everything we do. Every tiny home is supplied with certified electrical and gas installations so you can move in knowing your home meets New Zealand safety standards.

Whether you're looking for a permanent residence, holiday retreat, farm worker accommodation or investment property we are committed to turning your ideas into a beautifully crafted custom tiny home you'll be proud to own.

Built around you

Custom Designed. Premium Construction.

At NZ4U2U, every home is individually designed and custom built to suit your lifestyle, budget, and vision. From layouts and room sizes to kitchens, storage, finishes, colours and fixtures, every detail is tailored to your needs.

Once your design is finalised, we build using premium New Zealand materials and proven methods to deliver quality, comfort, and long-term performance.

Each home features LVL timber framing and treated Strandfloor® flooring sourced from Juken New Zealand. The floor, walls, and ceiling are fully insulated, enveloped in premium building wrap, and shadowclad® is secured over a 20mm ventilated cavity system for improved moisture management and thermal performance.

Your exterior can be customised with any cladding options. Including timber weatherboards, Shadowclad® and COLORSTEEL®.

Custom flashings, spouting and double-glazed aluminium windows are manufactured locally in Canterbury for quality and a precise fit.

Internally the walls are lined with durable 10mm Triboard® for a smooth, hard-wearing finish, while ceilings feature 9mm grooved MDF panels for a clean, modern look.

Every home is built on a heavy-duty Duragalv trailer triple or tandem-axle trailer with a removable drawbar manufactured in Christchurch.

Designed for the way you live

Because every NZ4U2U tiny home is custom built, the interior is designed around the way you want to live.

Our kitchens and wardrobes are custom manufactured in Christchurch and designed to maximise space, storage and functionality.

Your home includes a range of quality features:

- Custom-designed kitchen and wardrobe cabinetry
- Energy-efficient LED lighting throughout
- Double power outlets
- Instantaneous gas hot water system
- Gas cooktop
- Kitchen rangehood
- Bathroom extractor fan
- Heated towel rail
- Quality tapware and fittings
- Heat pump for efficient heating and cooling
- Double-glazed aluminium windows for superior thermal performance and comfort
- Acrylic shower, modern toilet, vanity and mirror cabinet

No two NZ4U2U tiny homes are the same. Every home is thoughtfully designed, individually crafted and built to deliver the perfect balance of style, functionality, comfort and lasting quality.
